EXPERIENCE

Software Engineer

Comviva

📅 Nov 2020 – Present   📍 Bhubaneswar, Odisha, India

- Developed various reusable Angular components and a common set of base CSS styles with utility classes which helped in providing a uniform look across different microfrontends.
- Improved grid layout and simplified existing components and HTML templates.
- Implemented an Attribute Based Authorization Control in the UI layer.
- Worked on code quality improvement by developing a pre-commit pipeline using husky for custom commit message linting, code linting and formatting the staged code using prettier.

Software Engineer Intern

Comviva

📅 Jan 2020 – Oct 2020   📍 Gurugram, Haryana, India

- Got industrial hands on exposure to frontend development using Angular.
- Got exposure to various backend technologies and frameworks like Springboot, JPA, Hibernate and databases like PostgreSQL.

PROJECTS

Hospital Joyride

Philips Code to Care'19

📅 September 2019   📍 Bangalore

- A one-stop platform for parents to book doctor appointments using an interactive chatbot and at the same time provide an interactive storyline for childrens to encourage them to go to the hospital and take medicines.

OptiBOM

Dell Hack2Hire'19

📅 August 2019   📍 IIIT Bhubaneswar

- A one-stop platform for the commodity manager for predicting the best configuration computer based on best price, supplier performance rating, and commodity performance rating.

Classessment

UtkalHacks

📅 March 2019   📍 Cuttack

- This application is a solution for better feedback to the teachers and to improve the interaction between the students and the teacher.
